Use

Control + Shift + m

 to toggle the

tab

 key moving focus. Alternatively, use

esc

 then

tab

 to move to the next interactive element on the page.

Attach files by dragging & dropping, selecting or pasting them.

Use the readme file to give an overview of what is contained in the codebook. This will serve as a cover page to the codebook repository.

Throughout the pdf document, link to the files on the GitHub repository to refer to the relevant code (just copy the url of the file on your repository). Make sure to only use links to this GitHub repository, not any of your other repositories you might have outside the classroom.

(Of course linking to other people's open GitHub repositories as a reference is ok)

Commits to the GitHub page after the deadline will be flagged as late submissions, and will be treated as such.

Finally the GitHub repository has to be downloaded as a zip file and uploaded to the OneDrive submission link provided on Moodle as part of the submission.
